Priorities for Care of the Dying Person

Priorities for Care of the Dying Person

The care of people that are dying and support for their families is something that almost all health and social care staff contribute to, consider of great importance in their role and can get great satisfaction from. However, there is a high level of concern that patients and their families are not being cared for with sufficient dignity, compassion or expertise and that there is much that can be improved in their experience in the last days of their life.

e-ELCA is a resource that can provide a great deal of support for the development of staff. It is however unlikely to be the only training element that staff will require.

A small number of sessions have been identified as 'core' and 'additional' for a range of staff groups, which focus specifically on care in the last few days and hours of life. Sessions in e-ELCA have also been mapped to the nine high-level learning objectives in the [One Chance to Get It Right report](#), developed by the Leadership Alliance for the Care of Dying People in 2014. A guide is available for you to view/download [here](#).

Palliative and End of Life Care Profiles

Indicator keywords

These profiles have been developed by the National End of Life Care Intelligence Network (NELCIN) to improve the availability and accessibility of information and intelligence around palliative and end of life care. They provide an overview across multiple geographies in England, to support commissioning and planning of local services.

The data in the profiles are grouped into domains. These include:

- place of death
- underlying cause of death
- mortality
- death in usual place of residence (DIUPR)
- care homes and community
- dementia

[Classification of place of death](#) is a guide that supports the methods used for all place of death indicators on these profiles.

START
Go to the data

Recent updates

November 2019
The place of death domain has been updated and now contains data for 2018 for England, Government Office Region, STP, CCG, County, Unitary Authority, District and SCN geographical areas. The cause of death domain has been updated and now contains data for 2018 for England, Government Office Region, STP, CCG, and SCN geographical areas.

October 2019
The temporary care home residents indicator located within the care homes and community domain has been updated and now includes data for 2017 for England, Government Office Region, STP, CCG, County, Unitary Authority, District and SCN geographical areas.

September 2019

Resource directory

This directory of intelligence and guidance supports the data in these profiles. These cover the following themes:

- [policy and guidance](#)
- [place of care](#)
- [conditions](#)
- [inequalities](#)
- [data and intelligence](#)
- [commissioning and contracting](#)
- [education and training](#)

This will be updated regularly.
